

2008 March 1, Sat

All night radiation - more than one Menon was awake, targeting me. Today the same pattern, Meghana Menon and the adults very casually increasing the radiation from time to time, getting me to shout out whenever they got bored. Otherwise keeping the radiation on at discomfort level continuously - my skin prickling, sensation of heat on upper body.

Now 3pm, I tried to take a nap in my study, an adult Menon (AMs brother I assume) immediately getting stimulated, concentrating on slowly increasing the radiation targeting my upper body until I shouted out.

Monish Das also active with the radiation exposure today.

3:10pm, radiation is targeting my head and upper body.

Outside the paandi poice roaming around ... Inspector Naga* going "avaruke vidarde!"

2008 February 29, Fri

Last night Meghana Menon and the other menon paandis again repeating the pattern of the previous nights paandi festival - when all the paandis outside had assembled in the middle of the night, she increased the radiation to get me to wake up and shout - then the whole lot of them started up their nautanki. And Meghana Menon and the other family members roamed about downstairs muttering to each other, casually coming back underneath me about once every half an hour or so to give me another burst of radiation and make me shout out. At one point one of the Menon paandis was targeting my genitals for about 5 minutes. Later dozed off to wake up again with the paandis targeting my abdomen with high radiation - a heavy cramping sensation. Even after I shouted out several times, the paandi continued to target me in the same area.

Cherrapunji (maybe this is the police paandi that the other paandis refer to as Kumaresan?) showing up to mournfully inform the neighbourhood that the police could do nothing as the paandis had a letter from the American "grih mantri" - this is one of their standard lines, that the American sex deviants have "authorization" from the US Attorney General.

He was duly allowed to finish his script before being insulted by another paandi cop, and left the stage doing his sniffing act "ende joli poyi..." etc.

Paandi phone call on my mobile to get me up out of bed this morning - it rang a couple of times before I got to it. When I picked it up, the fellow hung up. Left the room, it rang again. Aggressive fellow shouting "maya?". The calling phone number was 97311 35503.

Now 9:05am in my study, as soon as I sat down, the menon paandis setting up with high radiation, and Monish Das on the right setting up his set of radiation equipment. Shouted out a few times, no effect. As noted before, the Menons and Monish Das very deliberate in their radiation exposure these days - nothing impulsive about it at all - they keep the radiation exposure high, and if there is some paandi nautanki going on outside, they will respond to it with bursts of radiation and theatrical muttering amongst themselves.

Around noon nimhans paandis were in the Menons flat downstairs - from the sound of it it seemed all very "serious" stuff - secret court bench decisions etc. I was in my kitchen preparing my lunch.

Now 1pm, Meghana Menon below me targeting me as soon as I returned to sit in my study. Radiation targeting my abdomen and chest.

3pm, radiation has increased - again in response to the paandi nautanki outside, Monish Das and Meghana Menon simultaneously targeting me now. Pressure and pain in chest, neck and head feeling a heat sensation. I shouted out as loudly as I could several times, the little whore continued to target me - they really are enjoying themselves these days...

3pm - AM's brother targeting me as I sat on the bathroom commode - this homosexual feces pervert has for the past few days, consistently taken over the porno-sadism duties the minute I go to the bathroom to sit on the commode.

3:50pm, the moment I sat down in my study, high radiation - Meghana Menon back on duty.

4:40pm, continuously high radiation targeting my head - Menons targeting me.

5:40pm, a Menon paandi continuously keeping the radiation beam focused on me for the past hour as the american paandis do their "woe is us" "they believe him !" routine.

2008 February 28, Thu

9:15am - just updated my website and the NHRC via email with my logs. Usual paandi nautanki outside on the road, a shrieking woman going "saare". Now Monish Das very deliberately targeting me with radiation while the Menons simultaneously target me from below.

1pm in my study - Menons immediately targeting with high radiation as soon as I sat down, skin prickling on my neck and back. Meghana Menon a few minutes before practicing her "I'm sorry ..." routine.

1:30pm, a menon paandi continuing to get his sadistic fix, increasing the radiation in bursts until I shout out.

Afternoon, the american homosexual "reporter" with the nimhans paandis downstairs - for them the sex deviant high comes from the voyeurism, from getting as close to me as possible, and the attention they get when they make their expert comments on the street. No change in the radiation, the menon paandis keeping me targeted ... q&a session in their living room, while below me another menon paandi made sure I get my dose of radiation continuously!

5pm, Meghana menon has been targeting me all afternoon, while the paandis outside do their routine.

7:15pm, Monish Das getting active - he is targeting me right now, along with the Menons below me.

Building security guard knocked on my door in the evening, showed me a letter asking if it was for me. It was from a company called Thermax, the address on the envelope was my flat address (142 Shine On) etc. but the addressee was "Facilities Manager, Total Environment - Hemant ..singhe"!!

Outside the paandis immediately began their barking "He's a rajput!". Completely surreal ...

9:55pm, the Menon paandis have been periodically spiking the radiation just to see what reaction they can get from me - Meghana Menon in some sort of strategy session with the adult Menons (reacting to some nautanki from the paandis outside) but as always, the radiation exposure is maintained.
