

2009 03 01 Sunday

11:15am, ever since I got up this morning, a tight constriction in my chest, pressure sensation in my head. The Menon paandis keeping a concentrated beam on my upper body all night - at one point was woken up by the radiation to find the entire team of Nimhans and police paandis eager and ready to start the nights nautanki. They prefer to have me awake and listening so that I will record their activity in this log - just as the Menon paandis get frustrated if I am busy all day with something and do not enter anything in my diary. A huge burst of radiation fixes that, I open the file to log it and they are happy.

Once I was awake and had stopped shouting, Satan jr. and the Nimp kicked off the nights drama off by loudly announcing that Shuba Balivada from flat 122 had withdrawn her complaint about Ravi Menon having sex with his minor niece, the reason apparently being that I was "showing them what to do", and that only one more complaint had to be taken care of and then they could continue being "monkeys", then elaborating further that Nagaraja was a "trained monkey". Then the police "reacting" in anger, nimhans paandi male arriving within 5 minutes in the vicinity of the flat to loudly denounce Shuba Balivada, then a whole enthusiastic naatak of arresting and releasing going on - Nagaraja being "caught" and then regretfully released because he was the "IGs favourite policeman". The nimhans male paandi loudly reprimanding the other long-time female Nimhans perverts that have been stalking me - "you are shameless!" Meanwhile the Menons very carefully concentrating the beam on the centre of my chest and upper abdomen.

Early am, one of the neighbouring Marwari feces cult group that have taken up residence here, loudly protesting on the road the detention of a "havaladar" to add to the woe is us laments of the degenerate group.

Now 11:20am, Meghana Menon and Ravi Menon taking turns targeting me - Meghana Menon occasionally practicing her dramatic "i'm not doing anything" and then changing mode do some strategic whispering with her sex partner uncle "what do we do?"

I am going to Bir in Himachal Pradesh in a couple of weeks for the spring paragliding season - the entire troupe of degenerates is eager to keep the woe is us laments "we can't go anywhere" "elaarake kootam ponoo" going until they can all show up in Bir to enjoy the unique perspective of video game sadism - targeting me on the launch site and in the air with their radiation equipment. Targeting me in Bangalore my study and in my bed is so boring - the same blase' neighbourhood audience, a fixed target. Going to a new place gives them a high, a completely new flabbergasted audience, people who haven't seen their pornographic collection of videos, new opportunities for voyeurism, so many guesthouse bedrooms and bathrooms to get their peepshow equipment into, new sex degenerate recruits, new sexual partners. Perks for the paandis.

These are after all sophisticated sadists working on a top secret mission for their country - showing off the ashoka pillar emblem on their Ministry of Defence authorization letters. "Satyamev jayate" indeed ... not exactly a motto fit for our government officers with a culture of corruption, treachery, evasion and unmitigated, unrelenting cowardice and obsessive sexual perversion - government sponsored sex degenerates.

2009 02 27 Friday

The Nimhans paandis coming to visit the Menons as usual for their debriefing ... to ensure everything is going to plan as per their nautanki scripts.

9:35pm, the Menon paandis increasing the radiation steadily over the past five minutes, getting me to shout out, then increasing it again. It was first Meghan menon, then after I shouted out, an adult taking over. Outside the police paandis bleating and wailing "saare saare ..."

2009 02 26 Thursday

Strong radiation through the day from the Menons - they were keeping it constant for the most part. Went to Spencers dept store on 80ft road Jeevanbhimanagar, two marwari paandi males - middle aged, waiting there for me. Somehow these sex degenerates just want to get my attention it seems. The staff at spencers muttering to me to take their photos, they were paandis. They left after about five minutes of discussing whether anyone would be a witness on my behalf.

I wonder if these were the contract builders for my flat - when I returned home, more TE employees on the road outside my flat, making some comments as I drove past. There is a new cleaner employed by Total Environment at our building, and he seems to have been recruited like Mani and the other deranged staff of TE for his mental derangement - prominently displays a tilak on his forehead, and seems to relish knocking on my door and asking if I have any garbage. Heard the security guards at my building muttering that he was another "tatti" waala from the company.

Now 7:25pm and it is increasing.

2009 02 25 Wednesday

The Menon sex deviants using different radiation today - I am feeling nauseous, dizzy and have a headache. Meghana Menon and Ravi Menon taking turns during the day to target me, "jyothsna" targeting me during the night along with the others. As usual, the paandis outside bleating and squawling but it was a bit muted today, as if they were a bit bored.

Now 9:15pm, Ravi Menon below me keeping me targeted as I write this. Sensation of pressure in my head, chest feels constricted and my body feels hot. I guess they have all the toys running now.

2009 02 24 Tuesday

Last night again sustained constant high radiation. The Menon are playing a new game now for my benefit - starring Meghana Menon as the guilty one, being persuaded by the adult Menon sex deviants that she really needs to be in the hospital, it was getting impossible to control her etc.

Ravi Menons wife "Jyothsna" actively taking part in the nights sadism - sustained concentrated radiation targeting my head.

Now 6:30pm, sustained high radiation in my study, Ravi Menon targeting me. Nagaraja bleating outside as usual "avaruke vidarde!". Satan jr. and the Nimp happily rattling off a long list of my relatives names - uncles, cousins etc. - mimicking what they were allegedly saying about my predicament. And the name "Raju" figuring prominently - some sort of authority official - suspect a police paandi.

8:10pm, Meghana Menon giving me a big burst of radiation to get me to shout out, she is right under me on the sadism shift.

2009 02 23 Monday

Woke up middle of last night with intense radiation targeting my head, it stayed high even as I shouted out for several minutes. It appears "Jyothsna" has taken over some of the night shift sadism duties and like the killer "ammoma" Menon, she appears to be looking to cause damage.

This morning as well, intermittent high bursts of radiation in my study. Meghana Menon getting fidgety, getting me to shout out several times before she got her

fix.

Now 1:50pm about an hour ago, more police paandis shrieking in the vicinity of the building with "nyaan xxx aano" ... "nyaan xxx parniyon" ... "nyaan agathe poyo?" "naayi nyaano?" to stimulate the Menons to get their sadism act going. It was immediately followed by Meghana Menon giving me a burst of radiation as I brushed my teeth.

3:50pm, another round of high radiation in my study - the paandi Menons keeping it high and cycling it even higher to get me to shout out, the police perverts out on the road in a semi-comatose moaning state, I suppose resting before the nights sadism party.

2009 02 22 Sunday

6pm, very high constant radiation in my study targeting my upper body and head. Meghana Menon and the other sadist filth in the family getting set for the nights festivities.

The depraved little whore is really enjoying herself - doing the woe-is-me routine casually as if practicing her lines for a play, in between spiking the radiation for her compulsive sadism fix.

Nagaraja and "Kumaresan" doing their usual shrieking and bleating routines all night long to keep the Menon perverts alert and active on sadism duty. "Kumaresan" hanging around the building stairs in the middle of the night, shaking some chains each time I shout out. This has become his latest deranged fix. Last night while I was in my study I heard one of the other paandi police "reprimanding" him during their usual roadside nautanki, for coming into the building at night and knocking on my door to wake me up. I have heard Nagaraja and "Kumaresan" shrieking on the road the past couple of days "avare thorkula!"

2009 02 21 Saturday

Ravi Menon experimenting with various forms of radiation during the day as I worked in my study - I got a headache - then he used something that made me dizzy, my head literally falling forward before he took the beam off. The Menon paandis continued with the intermittent radiation all day long.

Went to the DRDO campus in the afternoon to get some groceries. As I walked back to the car, a plainclothes paandi cop standing there on the steps of the SBI bank making the usual paandi obsessive commentary. Saying something into a mobile phone about finding someone to speak to me in English. When I stared at him, the guy turned and faced away. Tall thin younger fellow.

In the evening I was in my balcony, and there was a new Marwari family in the building diagonally opposite doing the woe is us routine - a woman yelling "dekh lenge, kaun achche aadmi hain ..." It looks like there is a cluster of these perverts, that too in adjacent flats one above the other.

8:50pm, Meghana Menon spiking the radiation in my study, targeting my upper body and head with strong radiation - burning and pressure sensation in my head.

2002 02 20 Friday

Last night, it appeared Ravi Menon, his wife and Meghana Menon were all taking turns on sadism duty. In the morning while I was still in bed, some kids in the neighbourhood alerting me to the presence of the paandis on the street - calling out to me to warn me. Then heard the paandis quickly getting away making their usual woe is us shrieks. Satan jr. and Kumaresan starring in these unique "super agent/spy" scenes. Ravi Menon then making his frustration felt at the support given me, going out on to his balcony - "Damn you !"

Now 7:25pm, the depraved little killer Meghana Menon below me and getting fidgety, boosting the radiation to get me to shout out before she settled down.

2009 02 19 Thursday

The Menons periodically spiking the radiation during the day, interspersed with dramatic "what are we going to do?" routines. Outside on the road, Nagaraja and "kumaresan" competing with each other to shriek and bawl "saare! saare!" "vi-darde!" etc.

9:30pm, in my study - I have a bad headache, and the radiation has started climbing again. After I typed this, bursts of radiation from the Menons - skin on my sides and back burning and itching.
